

To whom it may concern

Rethymno, Crete, November 13, 2020

Letter of Support

Dear Sir/Madam,

This letter is to express our support to the Proposal for a Master Course in “*Health Psychology for clinical and medical contexts*” at the University of Rome.

I have carefully read the overall proposal, the description and the academic content of the Master Course, and I believe that the professional training in clinical health psychology, as described in the proposal, will be very helpful and appreciable. Medical settings typically are the main field for the application of health psychology-related interventions. Thus, it is crucial for young health psychologists to have the appropriate relevant training, an opportunity which the new Master Course will definitely provide.

Sincerely,

Evangelos C. Karademas, PhD, FEHPS

President of the European Health Psychology Society

Professor of Clinical Health Psychology, University of Crete, Greece
Research Fellow, Foundation for Research and Technology-Hellas (FORTH)
Assoc. Editor, Translational Behavioral Medicine
Assoc. Editor, Psychology – The Journal of the Hellenic Psychological Society
